

What is claimed is:

1. A coatable mixture, comprising:
inherently conductive polymer, and
a non-ionic waterborne polymer.
- 5 2. The mixture of Claim 1, wherein the inherently conductive polymer is polyaniline.
3. The mixture of Claim 2, wherein the inherently conductive polymer
10 is lignosulfonic acid-grafted polyaniline.
4. The mixture of Claim 1, wherein the non-ionic waterborne polymer is selected from the group consisting of acrylic polymers and urethane polymers.
- 15 5. The mixture of Claim 4, wherein the urethane polymer is an aliphatic polyether polyurethane.
6. The mixture of Claim 5, wherein the polyurethane has a high MVTR.
- 20 7. The mixture of Claim 1, further comprising a non-ionic thickener.
8. The mixture of Claim 1, further comprising a non-ionic anti-settling agent.
- 25 9. A coating of the mixture of Claim 1.
10. An article protected by the coated mixture of Claim 9.
11. A method of using a coatable mixture of Claim 1, comprising
30 applying the mixture to an article.
